ELSEVIER

Thin Solid Films 375 (2000) 306–312

thin solid films

www.elsevier.com/locate/tsf

Subject Index of Volume 375

$[Ni_{80}Fe_{20}/Cu]_{15}$ multilayers
Structural study of $Ni_{80}Fe_{20}/Cu$ multilayers by X-ray diffraction, 205
Absorption edge
Growth and characterization of oriented $PbxTiO_3$ thin films, 159
Activation energy
Characterization of a silicon carbide thin layer prepared by a self-propagating high temperature synthesis reaction, 82
Adsorbed nitrogen
Thin film formation processes controlled by the momentum parallel to the substrate surface, 68
Adsorption
Investigations of Fuch–Kliewer phonons and hydrogen adsorption of 6H–SiC surfaces by high-resolution electron-energy-loss spectroscopy, 77
Aggregated films
Anisotropic optical constants of aggregated gold films by reflect -ion and transmission ellipsometry, 73
Alkali halide films
Thermochemical and thermionic properties of ionic crystalline films, 114
Aluminum
Creep mechanism of aluminum alloy thin foils, 104
Aluminum oxide
Photolithographic deposition of insulating Al_2O_3 films from thin amorphous films of aluminum complexes on silicon surfaces, 42
Anisotropy
Anisotropic optical constants of aggregated gold films by reflection and transmission ellipsometry, 73
Incremental permeability and magnetoimpedance effect in mumetal film annealed by using rapid temperature annealing technique, 51
Giant magnetoresistance and structural properties in Co/Cu/Co sandwiches with Si and Cr buffer layers, 55
Annealing
A new FCC metastable phase formed in Fe/Hf films upon annealing and its magnetic properties, 192
Orientation and photoluminescence of C_{60} crystallites in C_{60} -polymethyl methacrylate films, 292
Influence of annealing on magnetoresistance of Co/Cu multilayers, 59
Structural study of $Ni_{80}Fe_{20}/Cu$ multilayers by X-ray diffraction, 205
Aqueous
Electrochromic properties of aqueous sol-gel derived vanadium oxide films with different thickness, 238
Atomic force microscope (AFM)
The formation of pyrochlore potassium tantalate thin films by soft solution processing, 46
Atomic force microscopy
Structural and surface studies of tin oxide films doped with fluorine, 147
Atomic force microscopy (AFM)
Preparation and characterization of nanostructured silver thin films deposited by radio frequency magnetron sputtering, 300
Laser annealing of $SrBi_2Ta_2O_9$ thin films, 172

Barium
Dielectric properties of $(Ba_{0.5}Sr_{0.5})TiO_3$ thin films, 184
Barium oxide
Molecular dynamics calculations about misfit dislocations at the $BaTiO_3/SrTiO_3$-interface, 9
Barium titanate
Dielectric properties of ferroelectric strained superlattices $BaTiO_3/SrTiO_3$, 255
Boron carbonitride
Ternary BCN thin films deposited by reactive sputtering, 247
BST film
The effects and mechanism of chemical additives on the pyrolysis evolution and microstructure of sol–gel derived $BaxTiO_3$ thin films, 196
Buffer layer
Giant magnetoresistance and structural properties in Co/Cu/Co sandwiches with Si and Cr buffer layers, 55

Charge transfer complex
Formation and electrical properties of LB films based on *N*-hexadecylpyridinium–Cd $(dmit)_2$, 251
Cluster
Tellurium nanophase films prepared by low energy cluster beam deposition, 33
Co/Cu/Co sandwich
Giant magnetoresistance and structural properties in Co/Cu/Co sandwiches with Si and Cr buffer layers, 55
Coatings
IR properties of SiO deposited on VxO_2 thermochromic films by vacuum evaporation, 100
Cobalt
Growth of $CoSi_2$ films on Si (100) substrates by a two-step method, 37
Spectroscopic ellipsometry studies of buried $CoSi_2$ layers in Si formed by ion implantation with a metal vapor vacuum arc ion source, 280
Computer simulation
Molecular dynamics calculations about misfit dislocations at the $BaTiO_3/SrTiO_3$-interface, 9

PII: S0040-6090(00)01659-X

Conducting ceramic electrode
Conducting lanthanum nickel oxide as electrodes for lead zirconate titanate films, 87
Conductivity
Formation and electrical properties of LB films based on *N*-hexadecylpyridinium–Cd $(dmit)_2$, 251
Photoconduction and application of oxotitanium phthalocyanine dual-layered thin films, 363
Dielectric properties of $(Ba_{0.5}Sr_{0.5})TiO_3$ thin films, 184
Preparation and electric properties of $SrBi_2Ta_2O_9$ thin films by MOD method, 176
Copper
Effects of hydrogen plasma pretreatment on characteristics of copper film deposited by remote plasma CVD using (hfac)Cu(TMVS), 132
The degradation of TiN films on Cu substrates at high temperature under controlled atmosphere, 123
Creep
Creep mechanism of aluminum alloy thin foils, 104
Crystallization
Laser annealing of $SrBi_2Ta_2O_9$ thin films, 172
The effects and mechanism of chemical additives on the pyrolysis evolution and microstructure of sol–gel derived $BaxTiO_3$ thin films, 196
Structural and electrical properties of seeded lead zirconate titanate thin films, 24
Crystallographic properties
Investigation of crystallographic and pyroelectric properties of lead-based perovskite-type structure ferroelectric thin films, 288

dc-Magnetron sputtering
Structural study of $Ni_{80}Fe_{20}/Cu$ multilayers by X-ray diffraction, 205
Degradation
The degradation of TiN films on Cu substrates at high temperature under controlled atmosphere, 123
Depolarization field
Studies on the retention behavior of $SrBi_2Ta_2O_9$ thin films, 180
Deposition process
The effects and mechanism of chemical additives on the pyrolysis evolution and microstructure of sol–gel derived $BaxTiO_3$ thin films, 196
Structural and electrical properties of $PbTiO_3$ thin films on conductive oxide $LaNiO_3$ coated Si substrates prepared by sol–gel method, 220
Dielectric properties
Dielectric properties of $(Ba_{0.5}Sr_{0.5})TiO_3$ thin films, 184
Dielectric properties of ferroelectric strained superlattices $BaTiO_3/SrTiO_3$, 255
Preparation and electric properties of $SrBi_2Ta_2O_9$ thin films by MOD method, 176
Doping
Formation and electrical properties of LB films based on *N*-hexadecylpyridinium–Cd $(dmit)_2$, 251

Electrical properties and measurements
Photoconduction and application of oxotitanium phthalocyanine dual-layered thin films, 263
Effect of excess bismuth on the microstructures and electrical properties of strontium bismuth tantalate (SBT) thin films, 215
Structural and electrical properties of $PbTiO_3$ thin films on conductive oxide $LaNiO_3$ coated Si substrates prepared by sol–gel method, 220
Electrochemical reduction–oxidation
Studies on the structure and properties of a self-assembled phenylazonapht-halene monolayer, 242
Electrochromism
Electrochromic properties of aqueous sol-gel derived vanadium oxide films with different thickness, 238
Electron energy loss spectroscopy
Investigations of Fuch–Kliewer phonons and hydrogen adsorption of 6H–SiC surfaces by high-resolution electron-energy-loss spectroscopy, 77
Electron microscopy
Structural and surface studies of tin oxide films doped with fluorine, 147
Electron scattering
Influence of annealing on magnetoresistance of Co/Cu multi-layers, 59
Ellipsometry
Spectroscopic ellipsometry studies of buried $CoSi_2$ layers in Si formed by ion implantation with a metal vapor vacuum arc ion source, 280
Limitations of the Johs calibration method used in the calibration of ellipsometers, 168
Epitaxy
Molecular dynamics calculations about misfit dislocations at the $BaTiO_3/SrTiO_3$-interface, 9
Epitaxial growth characteristics of oxide thin films prepared by pulsed laser deposition, 271
Growth of $CoSi_2$ films on Si (100) substrates by a two-step method, 37
Epitaxial growth of W-doped VO_2/V_2O_3 multilayer on α-Al_2O_3(110) by reactive magnetron sputtering, 128
Evaporation
Effect of substrate on NO_2-sensing properties of WO_3 thin film gas sensors, 142
Exchange coupling
Dependence of exchange coupling on ferro- and antiferro-magnetic layer thicknesses in $Fe_{50}Mn_{50}/Ni_{81}Fe_{19}$ bilayers, 5

Facing target sputtering
Preferred orientation and ferroelectric properties of lead zirconate titanate thin films, 91
Ferroelectric film
Theoretical investigation of ferroelectric transitions in epitaxial ferro-electric films grown on a substrate, 259
Ferroelectric films
PZT ceramic/ceramic 0–3 nanocomposite films for ultrasonic transducer applications, 95
Ferroelectric properties
Studies on the retention behavior of $SrBi_2Ta_2O_9$ thin films, 180
Structural and electrical properties of seeded lead zirconate titanate thin films, 24
Preparation and electric properties of $SrBi_2Ta_2O_9$ thin films by MOD method, 176
Characteristics of $SrBi_2Ta_2O_9$ thin films prepared by pulsed laser deposition for non-volatile memory applications, 200
Effect of excess bismuth on the microstructures and electrical properties of strontium bismuth tantalate (SBT) thin films, 215
Preferred orientation and ferroelectric properties of lead zirconate titanate thin films, 91
Ferroelectric property
Characterization of lead zirconate titanate thin films deposited at low temperature by reactive facing target sputtering, 267
Ferroelectric thin films
Phase transition related stress in ferroelectric thin films, 15

Investigation of crystallographic and pyroelectric properties of lead-based perovskite-type structure ferroelectric thin films, 288
Ferromagnetic resonance
Growth and magnetic properties of Fe overlayer on S-passivated GaAs substrate, 64

Fluorine doping
Structural and surface studies of tin oxide films doped with fluorine, 147
Fourier transform infrared
Ternary BCN thin films deposited by reactive sputtering, 247
Fullerene C_{60}
Orientation and photoluminescence of C_{60} crystallites in C_{60} -polymethyl methacrylate films, 292

$GaAs_{0.57}Sb_{0.43}$ nanocrystals
Preparation and optical properties of $GaAs_{0.57}Sb_{0.43}$ nanoparticles embedded in SiO_2 films by radio frequency magnetron co-sputtering, 284
Gas sensor
Effect of substrate on NO_2-sensing properties of WO_3 thin film gas sensors, 142
Giant magnetoresistance
Curie temperature control of LaxMnOy thin film by changing the pulsed laser deposition conditions, 1
Giant magnetoresistance and structural properties in Co/Cu/Co sandwiches with Si and Cr buffer layers, 55
Grain boundary
Characteristics of $SrBi_2Ta_2O_9$ thin films prepared by pulsed laser deposition for non-volatile memory applications, 200
Growth mechanism
Epitaxial growth characteristics of oxide thin films prepared by pulsed laser deposition, 271

Hafnium
A new FCC metastable phase formed in Fe/Hf films upon annealing and its magnetic properties, 192
Hardness
Effects of processing parameters on the microstructure and hardness of the arc ion-plated TiN on a type 304 stainless steel, 163
Heat treatment
Dielectric properties of $(Ba_{0.5}Sr_{0.5})TiO_3$ thin films, 184
Hydrogen
Effects of hydrogen plasma pretreatment on characteristics of copper film deposited by remote plasma CVD using (hfac)Cu(TMVS), 132

Indium tin oxide
Interfacial structure of nano-granular thin films, 151
Inorganic compounds
Photolithographic deposition of insulating Al_2O_3 films from thin amorphous films of aluminum complexes on silicon surfaces, 42
Interface
Theoretical investigation of ferroelectric transitions in epitaxial ferro-electric films grown on a substrate, 259
Molecular dynamics calculations about misfit dislocations at the $BaTiO/SrTiO_3$-interface, 9
Interfaces
Interfacial structure of nano-granular thin films, 151
Interference effects
Absorbing film on metal for solar selective surface, 155
Ion implantation
Spectroscopic ellipsometry studies of buried $CoSi_2$ layers in Si formed by ion implantation with a metal vapor vacuum arc ion source, 280
Iron
The effect of microstructure and interface conditions on the exchange coupling fields of NiFe/FeMn, 224
A new FCC metastable phase formed in Fe/Hf films upon annealing and its magnetic properties, 192
Iron overlayer
Growth and magnetic properties of Fe overlayer on S-passivated GaAs substrate, 64

Johs calibration method
Limitations of the Johs calibration method used in the calibration of ellipsometers, 168

La modified lead zirconate titanate thin film
Limits of formation of random grown perovskite and pyrochlore phases in sol–gel derived La modified lead zirconate titanate thin films, 19
La $-x$PbxMnO $-y$
Curie temperature control of La $-x$PbxMnO $-y$ thin film by changing the pulsed laser deposition conditions, 1
Landau theory
Phase transition related stress in ferroelectric thin films, 15
$LaNiO_3$ (LNO) ceramic
Conducting lanthanum nickel oxide as electrodes for lead zirconate titanate films, 87
$LaNiO_3$ film
Structural and electrical properties of $PbTiO_3$ thin films on conductive oxide $LaNiO_3$ coated Si substrates prepared by sol–gel method, 24
Laser ablation
Epitaxial growth characteristics of oxide thin films prepared by pulsed laser deposition, 271
Curie temperature control of La $-x$PbxMnO3 $-y$ thin film by changing the pulsed laser deposition conditions, 1
Four regions of the propagation of the plume formed in pulsed laser deposition by optical-wavelength-sensitive CCD photography, 233
Characteristics of $SrBi_2Ta_2O_9$ thin films prepared by pulsed laser deposition for non-volatile memory applications, 200
Laser irradiation
Laser annealing of $SrBi_2Ta_2O_9$ thin films, 172
Tellurium nanophase films prepared by low energy cluster beam deposition, 33
Lattice mismatch
Theoretical investigation of ferroelectric transitions in epitaxial ferro-electric films grown on a substrate, 259
Layer thickness
Dependence of exchange coupling on ferro- and antiferro -magnetic layer thicknesses in $Fe_{50}Mn_{50}/Ni_{81}Fe_{19}$ bilayers, 5
LB films
Formation and electrical properties of LB films based on *N* -hexadecylpyridinium–Cd $(dmit)_2$, 251
Lead calcium titanate
Growth and characterization of oriented Pb $-x$CaxTiO$_3$ thin films, 159
Lead zirconate titanate
PZT ceramic/ceramic 0–3 nanocomposite films for ultrasonic transducer applications, 95
Structural and electrical properties of seeded lead zirconate titanate thin films, 24
Lead zirconate titanate thin film
Characterization of lead zirconate titanate thin films deposited at

low temperature by reactive facing target sputtering, 267

m-Line
Sol–gel derived nanocrystalline thin films of $PbTiO_3$ on glass substrate, 109
Magnetic properties
Growth and magnetic properties of Fe overlayer on S-passivated GaAs substrate, 64
Dependence of exchange coupling on ferro- and antiferro -magnetic layer thicknesses in $Fe_{50}Mn_{50}/Ni_{81}Fe_{19}$ bilayers, 5
Magnetic properties and measurements
A new FCC metastable phase formed in Fe/Hf films upon anneal -ing and its magnetic properties, 192
Preparation of FeSi/Cu nano-multilayer materials and their magnetic properties, 296
Influence of annealing on magnetoresistance of Co/Cu multilayers, 59
The effect of microstructure and interface conditions on the exchange coupling fields of NiFe/FeMn, 224
Magnetic structures
The effect of microstructure and interface conditions on the exchange coupling fields of NiFe/FeMn, 224
Magnetic tunnel junctions
Tunnel current, conductance and magnetoresistance in double-barrier magnetic tunnel junctions, 210
Magnetoresistance
Magnetoresistance effect in La—A—Mn—O (A = Ca, Ba) thin films synthesized by metal-organic decomposition, 228
Manganite
Magnetoresistance effect in La—A—Mn—O (A = Ca, Ba) thin films synthesized by metal-organic decomposition, 228
Measurement conditions
Limitations of the Johs calibration method used in the calibration of ellipsometers, 168
Metal-organic decomposition
Magnetoresistance effect in La—A—Mn—O (A = Ca, Ba) thin films synthesized by metal-organic decomposition, 228
MI effect
Incremental permeability and magnetoimpedance effect in mumetal film annealed by using rapid temperature annealing technique, 51
Microstructure
The effects and mechanism of chemical additives on the pyrolysis evolution and microstructure of sol–gel derived $Ba-xSrx\ TiO_3$ thin films, 196
Microstructures
Structural study of $Ni_{80}Fe_{20}/Cu$ multilayers by X-ray diffraction, 205
Multi-layer coating
Characterization of a silicon carbide thin layer prepared by a self-propagating high temperature synthesis reaction, 82
Multilayers
Influence of annealing on magnetoresistance of Co/Cu multi -layers, 59
Preparation of FeSi/Cu nano-multilayer materials and their magnetic properties, 296
The effect of microstructure and interface conditions on the exchange coupling fields of NiFe/FeMn, 224
Epitaxial growth of W-doped VO_2/V_2O_3 multilayer on α-Al_2O_3(110) by reactive magnetron sputtering, 128

Nanocomposites
PZT ceramic/ceramic 0–3 nanocomposite films for ultrasonic transducer applications, 95
Nanocrystalline
Sol–gel derived nanocrystalline thin films of $PbTiO_3$ on glass substrate, 109
Nanofilm
Tellurium nanophase films prepared by low energy cluster beam deposition, 33
Nanostructured silver thin films
Preparation and characterization of nanostructured silver thin films deposited by radio frequency magnetron sputter -ing, 300
Nanostructures
Study of structural and optical properties of nanocrystalline silicon embedded in SiO_2, 137
Interfacial structure of nano-granular thin films, 151
Nickel Oxide
Interfacial structure of nano-granular thin films, 151
Nickel substrate
Thin film formation processes controlled by the momentum parallel to the substrate surface, 68
Nitrogen dioxide adsorption
Effect of substrate on NO_2-sensing properties of WO_3 thin film gas sensors, 142
Nucleation
Effects of hydrogen plasma pretreatment on characteristics of copper film deposited by remote plasma CVD using (hfac)Cu(TMVS), 132

Optical coatings
An absorbing fractal film set, 188
Optical constants
Anisotropic optical constants of aggregated gold films by reflection and transmission ellipsometry, 73
Optical properties
Anisotropic optical constants of aggregated gold films by reflection and transmission ellipsometry, 72
Preparation and optical properties of $GaAs_{0.57}Sb_{0.43}$ nano -particles embedded in SiO_2 films by radio frequency magnetron co-sputtering, 284
Optical spectroscopy
Four regions of the propagation of the plume formed in pulsed laser deposition by optical-wavelength-sensitive CCD photography, 233
Organic semiconductors
Photoconduction and application of oxotitanium phthalocyanine dual-layered thin films, 263
Orientation
Orientation and photoluminescence of C_{60} crystallites in C_{60} -polymethyl methacrylate films, 292
Characterization of lead zirconate titanate thin films deposited at low temperature by reactive facing target sputtering, 267
Oriented growth, Optical properties
Growth and characterization of oriented $Pb-xCaxTiO_3$ thin films, 159
Oxides
Four regions of the propagation of the plume formed in pulsed laser deposition by optical-wavelength-sensitive CCD photography, 233
Epitaxial growth characteristics of oxide thin films prepared by pulsed laser deposition, 271

$PbTiO_3$ film
Structural and electrical properties of $PbTiO_3$ thin films on conductive oxide $LaNiO_3$ coated Si substrates prepared by sol–gel method, 220
$PbTiO_3$, Thin film

Sol–gel derived nanocrystalline thin films of $PbTiO_3$ on glass substrate, 109
Phase formation
Limits of formation of random grown perovskite and pyrochlore phases in sol–gel derived La modified lead zirconate titanate thin films, 19
Phase transition
Theoretical investigation of ferroelectric transitions in epitaxial ferroelectric films grown on a substrate, 259
Phase transition related stress in ferroelectric thin films, 15
Phenylazonaphthalene
Studies on the structure and properties of a self-assembled pheny -lazonaphthalene monolayer, 242
Photochemical metal organic deposition (PMOD)
Photolithographic deposition of insulating Al_2O_3 films from thin amorphous films of aluminum complexes on silicon surfaces, 42
Photoconductivity
Photoconduction and application of oxotitanium phthalocyanine dual-layered thin films, 263
Photoluminescence
Orientation and photoluminescence of C_{60} crystallites in C_{60} -polymethyl methacrylate films, 292
Physical vapor deposition (PVD)
Preparation of FeSi/Cu nano-multilayer materials and their magnetic properties, 296
Plasma processing and deposition
Study of structural and optical properties of nanocrystalline silicon embedded in SiO_2, 137
Effects of hydrogen plasma pretreatment on characteristics of copper film deposited by remote plasma CVD using (hfac)Cu(TMVS), 132
Four regions of the propagation of the plume formed in pulsed laser deposition by optical-wavelength-sensitive CCD photography, 233
Polarization decay
Studies on the retention behavior of $SrBi_2Ta_2O_9$ thin films, 180
Polymethyl methacrylate
Orientation and photoluminescence of C_{60} crystallites in C_{60}-polymethyl methacrylate films, 292
Potassium tantalate
The formation of pyrochlore potassium tantalate thin films by soft solution processing, 46
Preferred orientation
Preferred orientation and ferroelectric properties of lead zirconate titanate thin films, 91
Pseudospin–phonon interaction
Theoretical investigation of ferroelectric transitions in epitaxial ferroelectric films grown on a substrate, 259
Pyroelectric properties
Investigation of crystallographic and pyroelectric properties of lead -based perovskite-type structure ferroelectric thin films, 288
PZT thin film
Preferred orientation and ferroelectric properties of lead zirconate titanate thin films, 91
PZT/LNO interface
Conducting lanthanum nickel oxide as electrodes for lead zirconate titanate films, 87

Quantum confinement and tensile stress effects
Preparation and optical properties of $GaAs_{0.57}Sb_{0.43}$ nano particles embedded in SiO_2 films by radio frequency magnetron co-sputtering, 284

Raman scattering
A study of residual stress on rf reactively sputtered RuO_2 thin films, 29
Random growth
Limits of formation of random grown perovskite and pyrochlore phases in sol–gel derived La modified lead zirconate titanate thin films, 19
Reaction kinetics
Thermochemical and thermionic properties of ionic crystalline films, 114
Reactive facing target sputtering
Characterization of lead zirconate titanate thin films deposited at low temperature by reactive facing target sputtering, 267
Reflectance
IR properties of SiO deposited on $V-xWxO_2$ thermochromic films by vacuum evaporation, 100
Reflection spec.
An absorbing fractal film set, 188
Resistivity
Preparation of FeSi/Cu nano-multilayer materials and their magnetic properties, 296
Retention
Studies on the retention behavior of $SrBi_2Ta_2O_9$ thin films, 180
RF Magnetron sputtering
Preparation and characterization of nanostructured silver thin films deposited by radio frequency magnetron sputter -ing, 300
Ruthenium
A study of residual stress on rf reactively sputtered RuO_2 thin films, 29

Seeding
Structural and electrical properties of seeded lead zirconate titanate thin films, 24
Segregation
Study of structural and optical properties of nanocrystalline silicon embedded in SiO_2, 137
Self-assembled monolayer
Studies on the structure and properties of a self-assembled pheny -lazonaphthalene monolayer, 242
Self-propagating high temperature synthesis
Characterization of a silicon carbide thin layer prepared by a self -propagating high temperature synthesis reaction, 82
Silicides
Growth of $CoSi_2$ films on Si (100) substrates by a two-step method, 37
Spectroscopic ellipsometry studies of buried $CoSi_2$ layers in Si formed by ion implantation with a metal vapor vacuum arc ion source, 280
Silicon
Study of structural and optical properties of nanocrystalline silicon embedded in SiO_2, 137
Silicon carbide
Investigations of Fuch–Kliewer phonons and hydrogen adsorption of 6H–SiC surfaces by high-resolution electron-energy -loss spectroscopy, 77
Silicon carbide coating
Characterization of a silicon carbide thin layer prepared by a self propagating high temperature synthesis reaction, 82
Slip system
Creep mechanism of aluminum alloy thin foils, 104
SnO_2
Structural and surface studies of tin oxide films doped with fluorine, 147
Soft solution processing
The formation of pyrochlore potassium tantalate thin films by soft

solution processing, 46
Sol–gel
Limits of formation of random grown perovskite and pyrochlore phases in sol–gel derived La modified lead zirconate titanate thin films, 19
Sol–gel derived nanocrystalline thin films of $PbTiO_3$ on glass substrate, 109
Sol–gel process
PZT ceramic/ceramic 0–3 nanocomposite films for ultrasonic transducer applications, 19
Sol-gel
Electrochromic properties of aqueous sol-gel derived vanadium oxide films with different thickness, 238
Sol-gel technique
Investigation of crystallographic and pyroelectric properties of lead-based perovskite-type structure ferroelectric thin films, 288
Solar selective surface
Absorbing film on metal for solar selective surface, 155
Spectra
IR properties of SiO deposited on $V-xWxO_2$ thermochromic films by vacuum evaporation, 100
Spectroscopic ellipsometry
Anisotropic optical constants of aggregated gold films by reflection and transmission ellipsometry, 73
Sputtering
Ternary BCN thin films deposited by reactive sputtering, 247
Preparation and optical properties of $GaAs_{0.57}Sb_{0.43}$ nanoparticles embedded in SiO_2 films by radio frequency magnetron co-sputtering, 284
Epitaxial growth of W-doped VO_2/V_2O_3 multilayer on α-Al_2O_3(110) by reactive magnetron sputtering, 128
A study of residual stress on rf reactively sputtered RuO_2 thin films, 29
$SrBi_2Ta_2O_9$ thin film
Characteristics of $SrBi_2Ta_2O_9$ thin films prepared by pulsed laser deposition for non-volatile memory applications, 200
Steel
Effects of processing parameters on the microstructure and hard -ness of the arc ion-plated TiN on a type 304 stainless steel, 163
Strained superlattice
Dielectric properties of ferroelectric strained superlattices $BaTiO_3$ /$SrTiO_3$, 255
Stress
A study of residual stress on rf reactively sputtered RuO_2 thin films, 29
Phase transition related stress in ferroelectric thin films, 15
Strontium
Dielectric properties of $(Ba_{0.5}Sr_{0.5})TiO_3$ thin films, 184
Strontium titanate
Dielectric properties of ferroelectric strained superlattices $BaTiO_3$ /$SrTiO_3$, 255
Structural properties
Magnetoresistance effect in La—A—Mn—O (A = Ca, Ba) thin films synthesized by metal-organic decomposition, 228
Structure properties
Effect of excess bismuth on the microstructures and electrical properties of strontium bismuth tantalate (SBT) thin films, 215
Structure–property relationship
Studies on the structure and properties of a self-assembled pheny lazonaphthalene monolayer, 242
Sulfur passivation
Growth and magnetic properties of Fe overlayer on S-passivated GaAs substrate, 64
Surface and interface states
Growth of $CoSi_2$ films on Si (100) substrates by a two-step method, 37
Surface electronic structures
Thin film formation processes controlled by the momentum parallel to the substrate surface, 68
Surface phonons and adsorbate vibrations
Investigations of Fuch–Kliewer phonons and hydrogen adsorption of 6H–SiC surfaces by high-resolution electron-energy -loss spectroscopy, 77
Surface roughness
Laser annealing of $SrBi_2Ta_2O_9$ thin films, 172
Surface structure
Preparation and characterization of nanostructured silver thin films deposited by radio frequency magnetron sputter -ing, 300

Tellurium
Tellurium nanophase films prepared by low energy cluster beam deposition, 33
Temperature dependence
Dependence of exchange coupling on ferro- and antiferro -magnetic layer thicknesses in $Fe_{50}Mn_{50}/Ni_{81}Fe_{19}$ bilayers, 5
Texture
Creep mechanism of aluminum alloy thin foils, 104
Thermal control coating
Absorbing film on metal for solar selective surface, 155
Thermal desorption
Thermochemical and thermionic properties of ionic crystalline films, 114
Thickness limitation
Limits of formation of random grown perovskite and pyrochlore phases in sol–gel derived La modified lead zirconate titanate thin films, 19
Thin films
Structural and surface studies of tin oxide films doped with fluorine, 147
Titanium
Dielectric properties of $(Ba_{0.5}Sr_{0.5})TiO_3$ thin films, 184
Titanium nitride
Effects of processing parameters on the microstructure and hard -ness of the arc ion-plated TiN on a type 304 stainless steel, 163
The degradation of TiN films on Cu substrates at high temperature under controlled atmosphere, 123
TPR
Incremental permeability and magnetoimpedance effect in mumetal film annealed by using rapid temperature annealing technique, 51
Trans–cis isomerization
Studies on the structure and properties of a self-assembled pheny lazonaphthalene monolayer, 242
Transmission current
Angle dependence of transmission probability of incident electrons into thin oxide films and noise spectra, 275
Transmission electron microscopy
Interfacial structure of nano-granular thin films, 151
Effects of processing parameters on the microstructure and hard -ness of the arc ion-plated TiN on a type 304 stainless steel, 163
Tungsten
IR properties of SiO deposited on $V-xWxO_2$ thermochromic films by vacuum evaporation, 100
Tungsten oxide
Effect of substrate on NO_2-sensing properties of WO_3 thin film gas sensors, 142
Tunnel conductance
Tunnel current, conductance and magnetoresistance in double-barrier magnetic tunnel junctions, 210

Tunnel current
Tunnel current, conductance and magnetoresistance in double-barrier magnetic tunnel junctions, 210
Tunnel magnetoresistance
Tunnel current, conductance and magnetoresistance in double-barrier magnetic tunnel junctions, 210

Vacancies
Preparation and electric properties of $SrBi_2Ta_2O_9$ thin films by MOD method, 176
Vanadium
IR properties of SiO deposited on $V-xWxO_2$ thermochromic films by vacuum evaporation, 100
Vanadium oxide
Epitaxial growth of W-doped VO_2/V_2O_3 multilayer on α-$Al_2O_3(110)$ by reactive magnetron sputtering, 128
Vanadium oxide films
Electrochromic properties of aqueous sol-gel derived vanadium oxide films with different thickness, 238
Vector dependence
Angle dependence of transmission probability of incident electrons into thin oxide films and noise spectra, 275

Wavenumber
Angle dependence of transmission probability of incident electrons into thin oxide films and noise spectra, 275
Work function
Thermochemical and thermionic properties of ionic crystalline films, 114

X-Ray diffraction
Structural study of $Ni_{80}Fe_{20}/Cu$ multilayers by X-ray diffraction, 205
Incremental permeability and magnetoimpedance effect in mumetal film annealed by using rapid temperature annealing technique, 51
X-ray Photoelectron Spectroscopy
Ternary BCN thin films deposited by reactive sputtering, 247
X-Ray photoelectron spectroscopy (XPS)
The formation of pyrochlore potassium tantalate thin films by soft solution processing, 46

Zero reflectance
Absorbing film on metal for solar selective surface, 155
